

Environmentally Friendly

The children at Asquith Wolverton Mill have shown an interest in recycling. They have been busy collecting old newspapers, plastic cartons, clothes and shoes. To help the children separate each item, boxes were displayed around the nursery in the shapes of a milk carton, a shoe, a newspaper and a laundry bin. The children have had lots of fun bringing in recycling material from home and discovering what happens once they no longer have use for it.

This interest was sparked off by the children's new and improved garden, where the children have grown their own vegetables throughout the year. These have been used in their meals throughout the day by our nursery chef. To help the vegetables grow the children have been using their own home made compost which is helped along by the scraps that the nursery disposes of daily. This in turn then raised the question 'what do I do with the rest of my rubbish?'
